Projects

PLATTS COMMERCIAL PROTOTYPE

Client: McGraw Hill Financial Group

Technology: Liferay EE 6.2

Duration: 5 Months (Ongoing)

Role: Senior developer

Platts is the leading independent provider of information and benchmark prices for the commodities and energy markets. Customers in over 150 countries look to Platts' expertise in news, pricing and analytics to deliver greater transparency and efficiency to markets and help them make better informed trading and business decisions. Founded in 1909, Platts' coverage includes oil and gas, power, petrochemicals, metals, agriculture and shipping. A division of S&P Global, Platts is headquartered in London and employs over 1,000 people in more than 15 offices worldwide.

Technically Platts portal was to migrate from exiting solution to Liferay with using XSLT parsing. It includes the display portlets to show result based on XSLT parsing where source of XML was taken from two different repositories: NAS Storage and MarkLogic. NAS communication was established with SFTP and MarkLogic was consumed as REST service. Additionally portal consumes data from external database to showcase as listing

and chart view in portal. Shopping cart with WorldPay payment integration was implemented to establish sell of various types of products. Portal was connected with Oracle IAM to provide single sign on.

LIFERAY DECK (ANDROID)

Client: Cognizant CMP Department

Technology: Liferay EE 6.2

Duration: 1 Month

MTP WP5 LIFERAY MIGRATION

Client: Clearstream Banking SA (Deutsche Börse Group)

Technology: Liferay EE 6.2

Duration: 4 Months

Role: Offshore Technology Lead + Onsite Lead

Clearstream is an important player in the securities services industry with consistently high credit ratings. As an international central securities depository (ICSD) based in Luxembourg, we provide post-trade infrastructure and securities services for the international market and 54 domestic markets worldwide, with 2,500 customers in 110 countries. As a central securities depository (CSD) based in Frankfurt, we also provide the post-trade infrastructure for the German securities industry, offering access to a growing number of international markets.

“Clearstream” is a post-trade services provider owned by Deutsche Börse AG and operates on securities settlement systems. It hosts their business applications on top of JBoss Portal Platform, which is decided by the client to be migrated in to Liferay Portal platform. To leverage this requirement, the major portal infrastructure components made by Clearstream needs to be replaced by Liferay based APIs from exo-platform/gatein/pico container APIs provided by Redhat. This migration must support the existing functionalities of the business portlets, which are built using custom JSF-Portlet based framework called GAF. Project to migrate existing Jboss portal platform solution to Liferay solution. It having phases to analyze existing solution, prepare POCs and develop Liferay based solution for portal.

As an onsite lead, analyzed the requirements of infrastructure components and discussed with client about the feasibility of the requirements. Coordinated with offshore team about the requirements of infrastructure components. Analysis and outlining the features of the specific type of portal solution needed for this project (ex. infrastructure components, framework, environment etc.). Designed and developed different infrastructure components, reviewed the design and development artifacts of the other team members to ensure it adhere to the requirement/design.

STOXX DIGITAL TRANSFORMATION

Client: Stoxx (Deutsche Borse Group)
